

MOSTAFA MOHAMED ELTAWHEEL

Junior Data Analyst | Power BI • SQL • Python
Giza, Egypt | +20 111 261 1898 | mostafa.eltaweel000@gmail.com
[linkedin.com/in/mostafa-eltaweel](https://www.linkedin.com/in/mostafa-eltaweel)

PROFESSIONAL SUMMARY

Junior Data Analyst with hands-on experience in data analysis, business reporting, ERP systems, and data visualization. Skilled in Power BI, SQL, Excel, Python, DAX, and data modeling, with practical experience preparing and validating data, building interactive dashboards, analyzing trends, and supporting data-driven decisions.

Certified in Microsoft Power BI Data Analysis (PL-300) and Google Data Analytics, with ongoing professional training in Data Analytics, Artificial Intelligence, and Machine Learning. Strong analytical thinking, problem-solving, attention to detail, and ability to translate business requirements into clear and actionable insights.

TECHNICAL SKILLS

Data Analytics: Data Validation and analyze, Data Preparation, Reporting, Manage and secure

Power BI: Power Query, DAX, Data Modeling, Interactive Dashboards, KPI Development

SQL: Data Extraction, Filtering, Joins, Aggregations, CTEs, Subqueries

Python: Data Preparation, Exploratory Data Analysis

Excel: Pivot Tables, VLOOKUP, Data Cleaning, Data Analysis, Reporting

AI & Machine Learning: Machine Learning Fundamentals, Classification, Regression, Model Evaluation, Neural Networks, Deep Learning Fundamentals and Computer Vision

Business & ERP Systems: Receivable, POS, Payable, Business Process Support

PROJECTS

Electricity Theft Detection & Explainable AI

Python • Machine Learning • Deep Learning • Explainable AI

- Developed a practical AI-based solution for detecting electricity theft using smart-meter consumption data.
- Prepared and processed sequential electricity consumption data for machine learning and model inference.
- Worked with prediction analysis and risk classification to identify potentially high-risk cases.
- Applied explainability techniques to help interpret model predictions.
- Designed an application workflow connecting data processing, model inference, and result visualization.

Facial Emotion Recognition

Deep Learning • Computer Vision • CNN • Transfer Learning • Attention

- Developed a multi-class facial emotion recognition project using deep learning.
- Applied transfer learning with a pretrained CNN architecture.
- Explored attention mechanisms to improve feature representation.
- Worked with facial-expression datasets and image classification workflows.
- Evaluated model performance across multiple emotion classes.

Power BI Business Analytics

Power BI • DAX • Power Query • Data Modeling

- Built interactive dashboards for monitoring business performance and KPIs.
- Designed analytical data models using fact and dimension tables.
- Created DAX measures for business metrics and analytical reporting.
- Used Power Query to clean and transform raw datasets.
- Applied appropriate visualizations to communicate trends and support decision-making.

SQL & Python Data Analysis

SQL • Python • Excel

- Cleaned, transformed, and analyzed structured datasets.
- Used SQL joins, aggregations, CTEs, and subqueries to answer analytical questions.
- Used Pandas and NumPy for data preparation and analysis.
- Applied Excel Pivot Tables and analytical functions to summarize datasets and identify trends.

PROFESSIONAL EXPERIENCE

ERP Technical Support Specialist | Dewan Soft

Jan 2025 – Sep 2025

- Supported ERP users with system and data-related issues across daily business operations.
- Prepared, cleaned, and organized business data for operational and management reporting.
- Investigated data inconsistencies and supported troubleshooting to improve data accuracy.
- Worked with internal departments to understand reporting requirements and improve data workflows.
- Assisted with documentation and standardization of system and data processes.

CERTIFICATIONS & PROFESSIONAL TRAINING

Microsoft Power BI Data Analyst — PL-300 | Microsoft

July 2026

- Demonstrated knowledge of preparing, modeling, visualizing, and analyzing data using Power BI.
- Practical knowledge of Power Query, data modeling, DAX, report development, and interactive dashboards.
- Applied Power BI concepts to business analytics and reporting projects.

Google Data Analytics Professional Certificate | Google / Coursera

April 2026

- Completed an 8-course professional certificate covering the end-to-end data analytics workflow.
- Developed practical knowledge in data cleaning, analysis, visualization, SQL, Python, and data-driven decision-making.
- Completed a capstone project applying the analytics workflow to a real-world case.

Military Diploma — Data Analytics & Artificial Intelligence | Digilians

Dec 2025 – Present

Professional training and practical application in:

- Developed practical skills in Power BI, SQL, Python, and Excel for data analysis, reporting, and visualization.
- Applied Statistics, Probability, Data Cleaning, Data Transformation, and Exploratory Data Analysis to real-world datasets.
- Built interactive Power BI dashboards, data models, KPIs, and analytical reports to communicate insights and support data-driven decisions.
- Applied Machine Learning, Deep Learning, Artificial Intelligence, and AI Tools through hands-on projects, including neural networks and computer vision.

EDUCATION

Bachelor of Laws | Cairo University

2022

- Developed strong analytical reasoning and structured problem-solving skills through legal research and case analysis.
- Conducted detailed research and evidence-based analysis, evaluating complex information from multiple sources.
- Strengthened critical thinking and attention to detail when interpreting information and identifying relevant evidence.

PERSONAL INFORMATION

Military Status: Completed | Location: Giza, Egypt
