MOSTAFA MOHAMED ELTAWEEL

DATA ANALYST | BUSINESS INTELLIGENCE & APPLIED AI

Giza, Egypt | +20 111 261 1898 | mostafa.eltaweel000@gmail.com | LinkedIn | GitHub | Live Portfolio

PROFESSIONAL SUMMARY

Commercial Data Analyst and certified BI Specialist combining a background in enterprise ERP technical support and a Bachelor of Laws from Cairo University. Bridges critical evidence-based deduction and forensic metric diagnosis with advanced Power BI, SQL, Python, and autonomous AI automation. Proven track record modeling 1.05M+ financial transactions, diagnosing operational root causes for a 37% booking cancellation rate, and deploying end-to-end AI agent workflows. Holds Microsoft PL-300 and Google Data Analytics credentials.

CORE COMPETENCIES & MINDSET FRAMEWORK

Critical & Analytical Thinking: Root-cause diagnostic analysis, hypothesis stress-testing, evidence-based reasoning, data storytelling.
Business Intelligence & Analytics: Microsoft Power BI Desktop, DAX (Time Intelligence, iterators), Power Query ETL, Star Schema Data Modeling, KPI Reporting, Excel (Advanced, Financial & Operational Systems).
SQL & Data Engineering: Complex Joins, CTEs, Window Functions, Aggregations, Data Cleaning & Normalization, Schema Design.
Applied AI & Rapid Prototyping: Python, Pandas, NumPy, Scikit-learn, PyTorch, Computer Vision (CNN-LSTM, TrOCR), Streamlit Cloud Deployment.
Automation & Autonomous Agents: n8n Workflow Automation, Groq LLM API, Webhooks, REST APIs, JSON structuring, Google Sheets CRM.

FEATURED TECHNICAL PROJECTS

Hotel Booking Performance & Cancellation Diagnostics | Power BI, SQL, DAX

- Diagnosed 119k+ reservations across City and Resort hotels to uncover operational drivers behind a 37% cancellation rate.
- Formulated time-intelligence DAX measures isolating lead-time volatility (>90-day bookings had 2x cancellation likelihood) and distribution channel dependencies (OTA vs Direct).
- Authored SQL data transformations and built an interactive executive dashboard with targeted policy recommendations to protect peak occupancy.

Financial Fraud Analytics at Scale | Power BI & Financial Risk Modeling

- Modeled 1.05M synthetic transactions to identify high-risk anomaly patterns across 1,142 confirmed fraud cases (0.11% occurrence).
- Proved that 100% of fraud instances were concentrated in TRANSFER and CASH_OUT channels, creating filtered risk views that reduce manual transaction review hours for audit teams.

Autonomous AI Lead Qualification & CRM Agent | n8n, Groq API, Google Sheets

- Architected a 4-pipeline autonomous n8n workflow system capturing inbound sales inquiries across Telegram and Gmail.
- Integrated Groq LLM with prompt constraints to parse client intent, urgency, and budget into schema-validated JSON.
- Automated instant Telegram push notifications for high-priority leads and synchronized records to Google Sheets Mini CRM, cutting lead response latency from hours to under 30 seconds.

Electricity Theft Detection System | Python, CNN-LSTM, Streamlit

- Engineered a hybrid deep learning model combining 2D-CNN spatial consumption signatures with LSTM temporal anomaly modeling to detect meter tampering.
- Built and cloud-deployed an interactive Streamlit application enabling utility inspection teams to prioritize high-risk field inspections based on probabilistic scoring.

RxHand-AI: Prescription Recognition & Structuring | PyTorch, TrOCR, Streamlit

- Designed an open-vocabulary handwritten text recognition pipeline using Vision Transformers (TrOCR) to transcribe cursive physician notes.
- Structured unstructured clinical outputs into standardized JSON schemas with confidence scoring and human-in-the-loop review.

PROFESSIONAL EXPERIENCE

ERP Technical Support Specialist | Dewan Soft | Jan 2025 - Sep 2025

- Supported enterprise users with relational database and workflow issues, preserving data integrity across accounting and inventory modules.
- Cleaned, normalized, and extracted operational business data to fulfill departmental reporting and management dashboard requirements.
- Collaborated across departments to document data workflows, clarify business metric definitions, and eliminate reporting discrepancies.

CREDENTIALS & EDUCATION

Microsoft Certified: Power BI Data Analyst Associate (PL-300) | Jul 2026
Google Data Analytics Professional Certificate | Apr 2026
Applied AI & Data Analysis Diploma | Digilians (Completed; awaiting certificate issuance)
Bachelor of Laws (LL.B.) | Cairo University (2022)
